

IREDUS ALOO CHIPS * DEVSHOP RETAIL OS

Sales first. A working online business in 7 days, run for you, with results every Monday.

WHAT YOU ASKED FOR

From Raghu's note of 27 September, in your own numbers:

- **WhatsApp is your main channel, and it leaks.** Under 20% of messages sent are delivered. 50% of those are seen, 20% of seen get a reply, under 10% of replies order. Under 1% of messages sent become an order.
 - **No extra staff.** You want it automated.
 - **Trial orders** from the earlier Iredus database.
 - **Custom-label gifting** for birthdays, anniversaries, corporates, planners, hotels and restaurants.
 - **Referrals**, your best channel, measured and built into a programme.
 - Later: younger buyers (25 to 35), bars and B2B, lifestyle partners, packaging.
-

HOW I'D APPROACH IT

Fix the pipe before pouring more in. Delivery is the first leak. When four in five messages never arrive, every later step is working on a fifth of the audience. So I'd move WhatsApp to the official Business API, let customers order and pay inside the chat, and only then run campaigns.

Marketing and branding (the younger-audience campaign, packaging, partnerships) come in phase two, once weekly orders are steady.

THE PLAN

FOUR PHASES, SALES FIRST

Week 1 · the 7-day build

Official WhatsApp Business API number and Meta Business Verification, started on day 1 because it can take weeks. The store on aloochips.com with ordering and UPI payment from inside WhatsApp, so no one has to reply by hand. Order confirmations and shipping updates by WhatsApp and email. A "Who told you about us?" question at checkout.

Weeks 2-3 · the database

Clean and segment the earlier Iredus list. Only message people who agreed to hear from Iredus; everyone else gets a one-time ask to opt in. One trial-pack offer with a one-tap order. Send in small batches, measure each step, change one thing at a time.

Weeks 3-4 · gifting

A gifting page: custom label with a name and message, occasion date, delivery date. Birthdays and anniversaries saved, with a reminder before the date comes round again. A bulk and corporate quote form that comes to you to approve.

Month 2 · referrals

Each buyer gets their own code, with credit for the referrer and a thank-you for the friend, tracked in orders. Pay with a Post™ for customers who'd rather share than pay full price.

WHAT WE'LL MEASURE

These are the numbers to test, not promises. Your own figures are the baseline. I'll set targets with you once the first two weeks are measured, and report target against actual every Monday.

MEASURE	BASELINE (YOUR FIGURES)	HOW IT'S TESTED
Delivered ÷ sent	Under 20%	Official API, opted-in contacts, first 14 days
Sent → order	Under 1%	First 500 opted-in contacts, trial-pack offer
Gifting orders	To measure	First 30 days of the gifting page
Orders from referrals	Not tracked yet	From the checkout question, day 1

TERMS, IN PLAIN WORDS

Model	Profit share. DevShop's share of the profit pool is 40%, open to discussion between 25% and 40%. The pool is revenue less product and packaging, shipping, payment and platform fees, marketing and tech costs.
Brand	Stays entirely yours.
Deposit	₹5,000, fully adjusted against actual setup tech costs (hosting, database, WhatsApp number, email, domain, AI). DevShop keeps none of it.
Build time	Live within 7 days of the deposit, subject to your setup answers and third-party approvals (payment gateway, Meta, WhatsApp).
Term	12 months with a 30-day break clause. Ending early: DevShop receives 5% of revenue made through the store to that date.
Payments	Collected into DevShop's account and settled each Monday by 1 PM for the week before, with an itemised statement.
DevShop handles	Store, hosting and tech, WhatsApp, payments, shipping, Meta and Google, marketing execution, the Monday report.
You handle	Making the chips, stock, packing and handing orders to the courier.
Decided together	Offers and discounts, and any freelancers, because both come out of profit. You approve every campaign and every ad rupee.
Pay with a Post™	If switched on: 1% of the sales it drives, charged only once payment is received.

Full terms are on your private page: viratmohan.com/retail-os/terms/48a55e96-77a6-4950-900d-1553abbbbed3d

NEXT STEPS

1. **You:** answer five questions. Which WhatsApp tool and number do you use today? How big is the database, and how was each number collected? What is the trial-pack price and weight, the gift price and the bulk minimum? What are your weekly orders and average order value? Who approves campaigns?
2. **Both:** sign the NDA, then agree the share within 25 to 40%.
3. **You:** sign the terms on your page and pay the ₹5,000 deposit. The 7-day clock starts here.
4. **Day 1:** Meta Business Verification and payment gateway KYC started; domain pointed.
5. **Day 7:** the store is live with WhatsApp ordering. The first Monday report follows.

Let's talk.
