# ONE BOOKING PLATFORM FOR TWELVE VILLAS

Travaholic Stays ran on Airbnb, WhatsApp and a spreadsheet. We replaced all three with one branded platform, live on a real payment gateway.

12

### 12 villas

Live across Goa, Mussoorie and Himachal Pradesh.

### 3 tools replaced

Airbnb, WhatsApp and a spreadsheet, now one system.

### Real payments

Bookings run on a live payment gateway.

## WHAT WE BUILT

### 01 Booking & pricing

- Filterable villa catalogue
- Prices update themselves: weekday and weekend rates, peak pricing, long-stay discounts
- Guests book direct with dates, add-ons and coupon, full price shown before they submit

### 02 A calendar that never lies

- Dates lock only once payment is made, so an unpaid enquiry never blocks a paying guest
- Two-way Airbnb sync: book on either and both calendars update

### 03 Owners & payouts

- Each owner gets a private view of their calendar and earnings, booking by booking
- Payouts calculate themselves from each villa's commission rate
- Financial reports ready to export

### 04 Guest documents

- Branded booking proposals and confirmations, generated automatically
- Sent by email and WhatsApp at every stage

### 05 Your brand

- One branded platform in place of listings spread across apps

### 06 Licensable

- The same system can run your rental business, scoped to what you need
- New features worked out on a call

### WHAT MATTERED MOST

Making sure the calendar never lies. A date locks only when money is real, and stays in sync both ways, even against a system as locked-down as Airbnb's.

Run villas in Goa? *Let's map yours on a call.*
